

**U.S.O.**  
**EXHAUST**

**EXPERIENCE OF 45 YEARS**

©We experience proper pride of our experience more than 40 years in the sector on our wide product range and producers of exhaust proper to model.

---

**PRODUCT CATALOG (2017)**

Product groups are

Automotive: passengers, light and heavy commercials, off- roads  
TBI: trucks, buses, industries  
Agriculture: various machinery, tractors  
Energy: stationary and mobile generators  
Others: maritime, railway, defense machinery

Products non-related to exhaust systems consist of

***Pipes:***

ALM coated, steel welded, perforated, stainless or carbon steel pipes for fluid & flow systems, axes

***Metal parts:***

clamps, flanges, heat-shields, brackets, perforated sheets, various steel constructions, tanks, raincaps, seats, custom-made parts

USO possess an important edge over the competition in manufacturing and processing DKP, ALM coated, carbon- and stainless steel pipes between 35 - 127 mm Ø and 1.5 - 2 mm. thick.

Furthermore, the integrated infrastructure lets USO design and create in-house all parts of the exhaust systems including mufflers, front & rear pipes, heat-shields, clamps, brackets and flexible pipes using top-notch equipment for bending, numerically controlled tube end finishing, guillotine-shearing, hydraulic and eccentric pressing, MIG / TIG welding, CNC milling, plasma cutting, punching, painting and drying.

Solidworks, a CAD/CAM tool, is used for designing the components as well as the tools and the fixtures. Solidflow simulation tool is used for analysing the CKD components and products. As part of three-dimensional analysis process of Quality & Control, Wenzel measurement and Johnson master devices are calibrated to a 0.001 mm. deviation tolerance.
